

The Future of Infrastructure Management

Internet of Things

In the current day and age, technology powers every aspect of efficiently running a modern business. IoT in the Workspace is reliable, secure and data-driven to assist the organization in meeting its goals and maintaining a competitive edge while gathering the right insights and analytics.

IoT facilitates seamless communication between people, processes and things to bring efficiency.

IoT implementation helps organizations save money and provide a better experience to the stakeholders.

Hot Desking

Wayfinding

Facilities Management

Environment Control Air Quality

Smart HVAC Control

Lighting Management System

Asset Management

Washroom Management

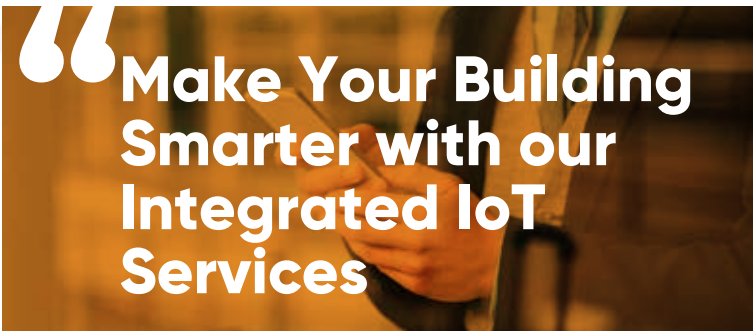

Energy & Sustainability Governance

Hybrid Workspace Management Solutions

The Internet of Things (IoT) is a network of objects—“things”—embedded with sensors, software and technologies that connect with other devices over the internet to exchange data seamlessly.

The data collected from their environment is used to learn and adapt in real-time to deliver automated services. IoT facilitates seamless communication between people, process and things to bring efficiency.

Make Your Building Smarter with our Integrated IoT Services

Remarkable results from our IoT solutions:

Reducing Energy Consumption

Improving Building Efficiency

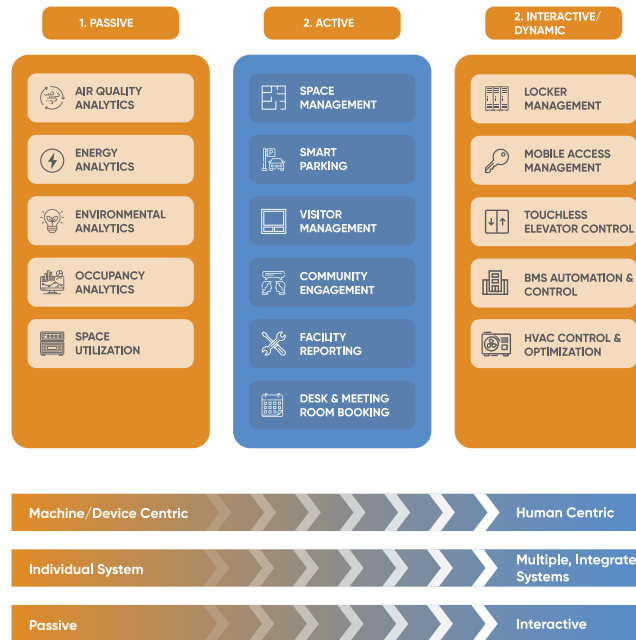

Predictive Maintenance
